

Tikel Features in Simple Words

1. Packaged Food Scan

What it does:

- Take a photo of any packet or scan its barcode.
- App shows calories and harmful ingredients.
- Paid users also see what each ingredient means, advice on how often to eat, and healthier alternatives.

In chat:

- User clicks “Scan” → chat asks for a photo.
- Result card appears with calories and ingredients.

Connected to:

- Can add the item to **Diary** (what you ate).
 - Can save to **Pantry** (what you have at home).
-

2. Vegetables / Fruit / Grain Scan

What it does:

- Take a photo of a raw item like apple, spinach, or rice.
- App identifies it and shows calories per 100g.
- Paid users also see health benefits, how to store it, and recipe suggestions.

In chat:

- User clicks “Scan Veg/Fruit” → chat asks for a photo.
- Result card shows name and calories.

Connected to:

- Recipes for cooking ideas.
 - Diary and Pantry for tracking.
-

3. Cooked Meal Scan

What it does:

- Take a photo of a full plate.
- App identifies the dish, estimates portion size, and shows calories.
- Paid users get a breakdown (e.g., curry + rice), swaps (healthier choices), and balance tips.

In chat:

- User clicks “Meal Scan” → chat asks for a plate photo.
- Result card shows dish name, calories, and suggestions.

Connected to:

- Diary (log your meal).
 - Diet Plan (adjust balance for the day).
-

4. Restaurant Menu Item Scan

What it does:

- Take a photo of a menu or search for a dish.
- App shows calories of each dish and portion estimates.
- Also, items are clickable so that the app knows what has been ordered
- Paid users see how the meal fits into their daily plan.

In chat:

- User clicks “Menu Scan” → chat asks for menu photo or dish name.
- Result card shows calories and advice.

Connected to:

- Diet Plan for comparing outside food with daily goals.
-

5. Pantry Mode

What it does:

- Track groceries you have at home and their expiry dates.
- Free users can store up to 5 items.
- Paid users get unlimited items and expiry alerts.

In chat:

- User types “Show my pantry” → chat shows a card with items and days left.

Connected to:

- Recipes (what can I cook with my pantry?).

- Nudges (alerts for items about to expire).
-

6. Food Diary and Tracking

What it does:

- Collects everything you log (scans, meals, recipes).
- Shows weekly and monthly calorie totals, flagged items, and streaks.
- Paid users see detailed charts and reports.

In chat:

- User clicks “Diary” → chat shows a summary card.

Connected to:

- Receives data from Scan, Meal, Recipes, Pantry.
 - Feeds info into Diet Plan for nudges.
-

7. Diet Plan + Restaurant Companion

What it does:

- Makes a daily/weekly meal plan based on your goal (weight loss, diabetes, balanced, muscle gain).
- Reminds you if you eat too much or too little.
- When scanning restaurant food, compares it to your plan.
- Premium adds “Rebalance” (fixes the rest of the day if you overeat).

In chat:

- User clicks “Diet Plan” → chat shows today’s plan.
- If user scans restaurant food, chat compares it to plan.

Connected to:

- Uses info from Diary, Meal Scan, Menu Scan.
 - Sends nudges to keep user on track.
-

How Features Connect

- **Food Scans → Diary + Pantry**
 - **Veg/Fruit Scan → Diary + Recipes**
 - **Meal Scan → Diary + Diet Plan**
 - **Menu Scan → Diet Plan**
 - **Pantry → Recipes + Nudges**
 - **Diary → Diet Plan**
 - **Diet Plan → Nudges**
-

Experience Idea

- Everything happens in chat. Either the user types or clicks a button.
- Each feature shows a **card** in chat with calories, advice, and actions.
- Features are linked so users naturally move from one to another (e.g., Scan → Diary → Diet Plan).

This makes Tikel feel like **one smart conversation** about food and health, not many separate tools.
